

ECP 1000-G

Peltier-Gas Cooler Series ECP®

Version ECP1000 with 1x 150 NI/h

Version ECP2000 with 2x 150 NI/h

Version ECP3000 with 1x 350 NI/h

Special Features

- With Jet-Stream heat exchanger available in three standard materials
- Ambient temperature up to +50 °C (122 °F)
- Outlet dew point adjustable from +2 °C (35.6 °F) to +15 °C (59 °F)
- Dew point stability ± 0.1 °C (± 0.18 °F)
- With Alarm contact
- Small dimensions, light-weight
- Optimum reliability
- Self-controlling

Application

ECP gas coolers are used in gas analysis to lower the dew point of humid to avoid condensate in the analyser. An extremely stable gas dew point avoids water vapour cross-sensitivity and volumetric errors.

Description

The electronically controlled peltier cooler produced by M&C incorporates the 'Jet-Stream' design of heat exchanger. This design induces condensate formation and guarantees optimum dew point reduction to a stable low value, eliminating the need for additional pre-drainage devices.

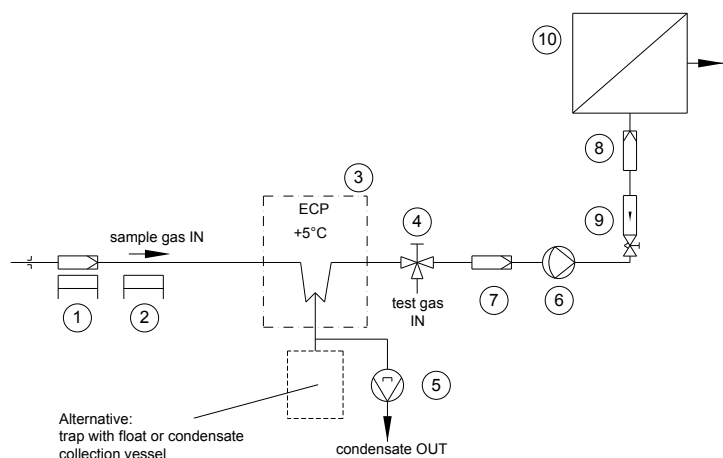

The condensate formed should be removed with a small peristaltic pump, simple trap or collection vessel. The simple construction employed enables heat exchanges of different materials to be used depending on the application.

The operating status of the cooler is displayed by three LED indicators, one each for over or under temperature alarm and one which pulsates showing the cooler is functioning correctly. The alarm status changes when the temperature deviates by ± 3 °C (± 5.4 °F) from the set point.

The compact lightweight design of this device makes it ideal for use in portable and compact continuous sample conditioning systems.

Application example for ECP

- 1 Heated filter sample probe SP210-H or SP2000-H
- 2 Heated sample line 4M4/6
- 3 Cooler ECP1000
- 4 3-way ball valve 3L/PV-1
- 5 Peristaltic pump SR25.2
- 6 Diaphragm pump MP47 or MP06/12 or N5KP
- 7 Fine filter FP-2T-D with liquid alarm LA1
- 8 Aerosol filter CLF-5 /W optional according to application
- 9 Flow meter FM10 or FM40, 25-250 NI/h
- 10 Analysers f. e. PMA1000
